Advisory Board

The Advisory Board of the PhD Programme in Law (DOTTiD) of the University of Genoa carries out a role of consultation and guidance regarding the scientific and educational project of the PhD Programme.
The Advisory Board involves representatives of the main categories within the fields of the professions, public institutions, and civil society, including – in particular – representatives of the judiciary, the legal profession, the public administration, and academia.
The Advisory Board supports the QA (Quality Assurance) Commission of the PhD Programme in Law in the definition of the educational objectives of the Programme itself, as well as of the cultural and professional profiles most appropriate and relevant with regard to the post-doctoral career paths.
The Advisory Board therefore meets in order to express opinions:
• on the topicality and relevance of the cultural and professional profiles with respect to post-PhD employment opportunities;
• on the topicality and relevance of the research lines of the PhD Programme;
• on the consistency of the educational objectives of the Programme with respect to post-PhD perspectives.
